Algorithms and Data Structures

Introduction for Biomedical Engineering IFE Students

Łódź 2017

General Information

- Lecturers :

Andrzej Materka

materka@p.lodz.pl

<http://www.materka.p.lodz.pl>

Phone: 42 631 26 27

Room 217, Building B9

Consultations:

<http://www.materka.p.lodz.pl/dydaktyka.html>

Marek Kociński

marek.kocinski@p.lodz.pl

<http://www.eletel.p.lodz.pl/kocinski/>

Phone: 42 631 26 17

Room: 205, second floor

Consultations: check in the callendar

https://poczta2011.p.lodz.pl/service/user/marek.kocinski@p.lodz.pl/studenci_2012.html

General Information

- **Lecture/Tutorial:** 30h (15 x 2 hours/week)
- **Venue:** room 413, building B9, Wólczańska 211/215

- **Credits:** 2 ECTS points (1 ECTS point = 25 - 30 h)
- **Self work:** 25 - 30 hours

- **Programming Language:** Python
- **Tools:** Enthought Python Distribution (EPD)

Most popular programming languages (GitHub 2011)

GitHub is a [web-based hosting service](#) for software development projects that use the [Git revision control](#) system. GitHub offers both paid plans for private repositories, and free accounts for open source projects. As of May 2011, GitHub was the most popular open source code repository site.^[3]

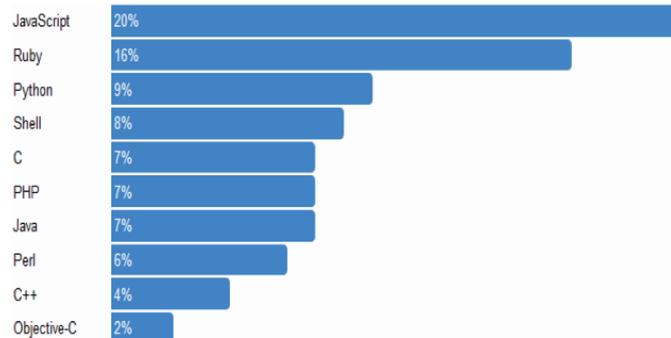

GitHub Inc. was founded in 2008 and is based in San Francisco, California.^[4]

In July 2012, the company received US\$100 Million in [Series A](#) funding, primarily from [Andreessen Horowitz](#).^{[5][6][7]}

www.enthought.com/products /canopy/

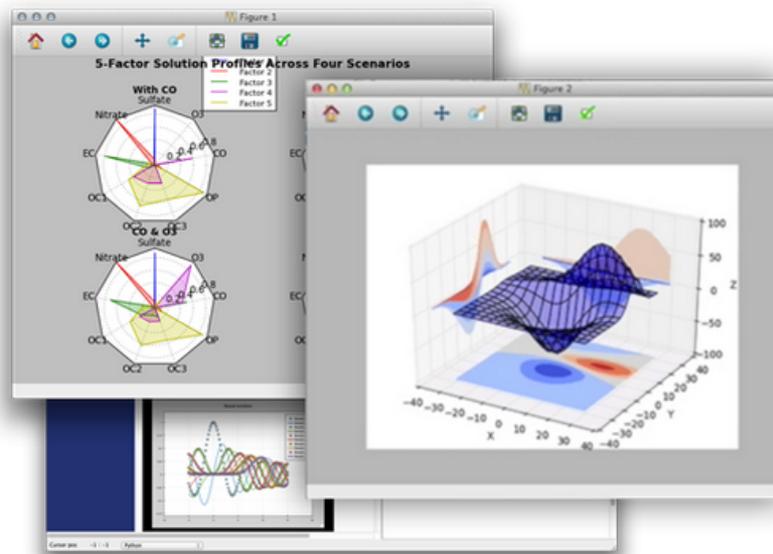

The screenshot shows a web browser window displaying the Enthought Canopy product page. The browser's address bar shows the URL <https://www.enthought.com/products/canopy/>. The page features the Enthought logo (Scientific Computing Solutions) and a navigation menu with links for PRODUCTS, SERVICES, COMPANY, and CONTACT. Below the navigation, there are links for Canopy Overview, Features, Compare Subscriptions, Academic License, Canopy Package Index, FAQ, and Export restrictions. The main content area includes the text "Explore. Develop. Visualize." and a description of Enthought Canopy as a comprehensive Python analysis environment. A large "Get Canopy" button is visible, along with a video player icon and the tagline "The big leap for your Python Environment." The background of the main content area features a grid of curved lines.

[Canopy Overview](#) [Features](#) [Compare Subscriptions](#) [Academic License](#) [Canopy Package Index](#) [FAQ](#) [Export restrictions](#)

What's in it for you?

Scientists and Engineers

A comprehensive, Python-based analysis desktop & Python distribution, Canopy provides an open and intuitive environment for scientific and analytic computing. Since it's Python, your algorithms, scripts and programs will never be locked into a proprietary language. And with the analysis desktop, data analysis, scripting and plotting are more straightforward.

Portable Power

Enterprise

As a comprehensive Python-based analysis environment, Canopy puts powerful, yet very cost-effective, tools in the hands of analysts, scientists and engineers. As a robust application platform, it streamlines technical computing application development and deployment for your organization and for your customers.

With the popular, intuitive Python language and the comprehensive Canopy application platform, your organization can deploy new applications, algorithms and analysis tools much faster than with standard software languages and platforms. Users, especially "power" users, can extend and innovate with scripting and open platform APIs, driving the creation and sharing of innovative techniques and tools.

- What is a computer in those applications?
- What functions does it perform?
- Why do we use computers?

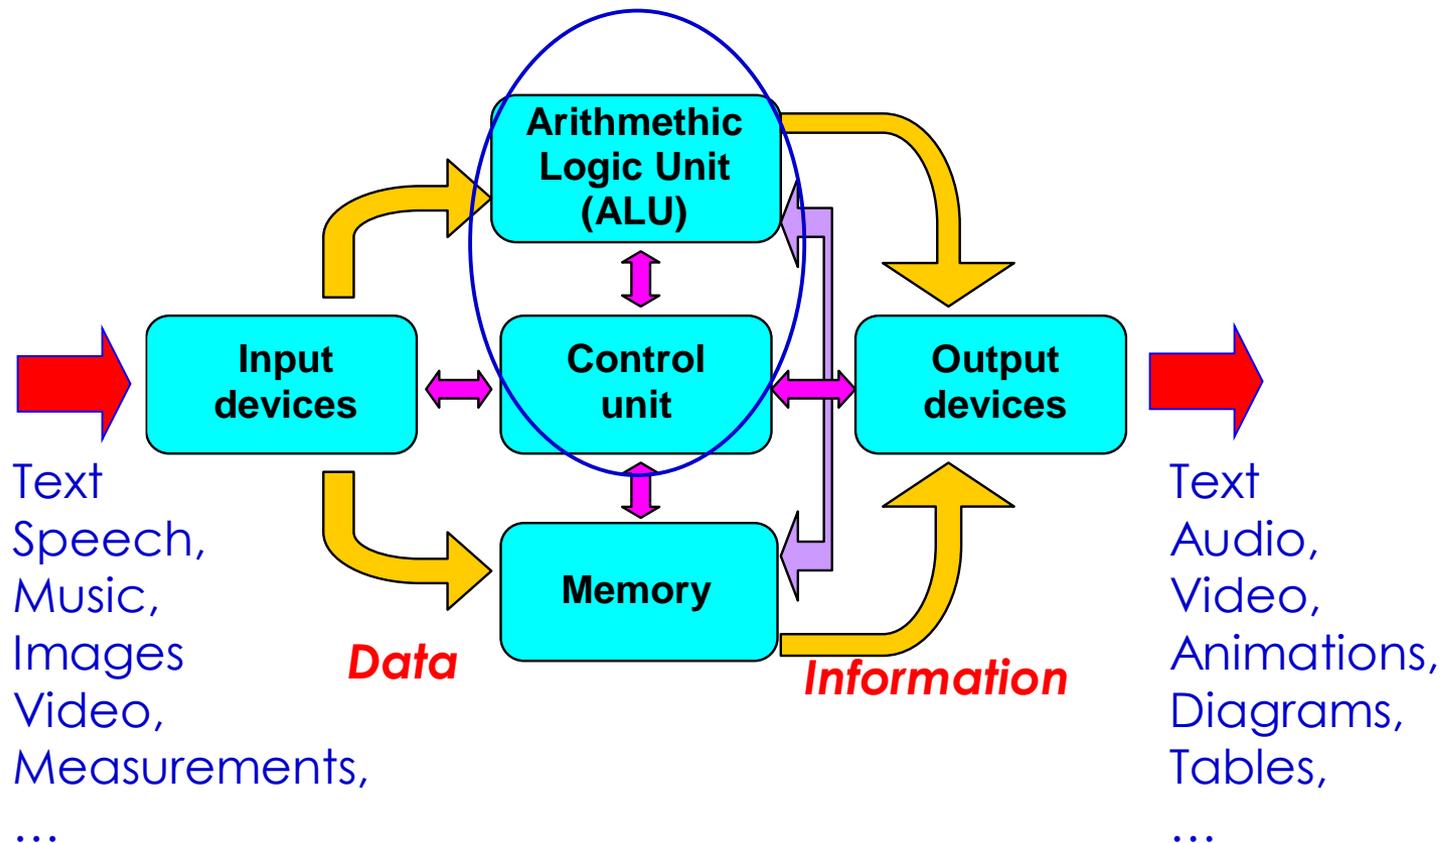

Basics of Computer Architecture

John von Neumann (1903-1957)

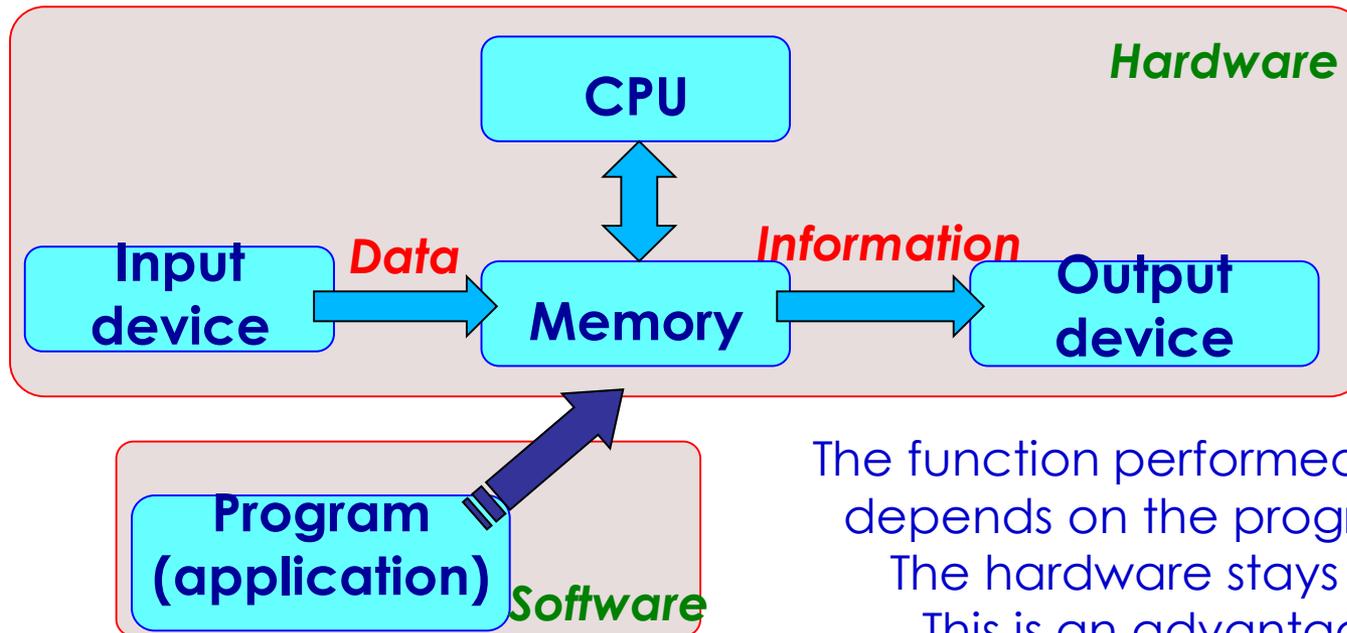

Basics of Computing

(Arithmetic Logic Unit + Control Unit) = Central Processing Unit (CPU)

The need for programming

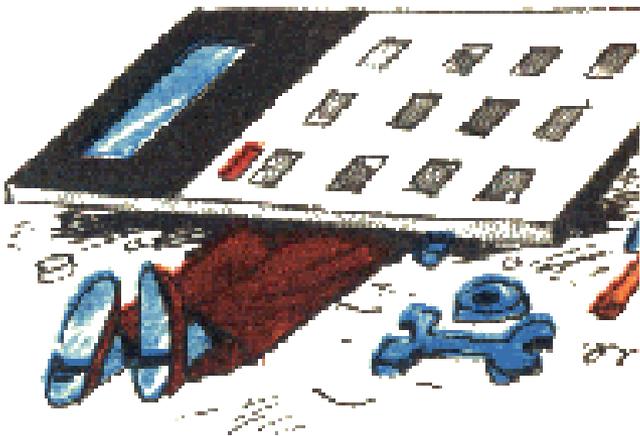

The function performed by a computer depends on the program (software). The hardware stays all the same. This is an advantage of digital computers (functional flexibility).

Basic assumptions

- The data are represented by binary numbers
- Time of execution of elementary instructions is very short
- The processing elements are of very small size

		Representation			
decimal		binary			
10	1	8	4	2	1
	0				0
	1				1
	2			1	0
	3			1	1
	4		1	0	0
...			...		
1	5	1	1	1	1

- decomposition into simple operations
- robustness to noise

Basic operations

Examples of binary operations

Rules of addition

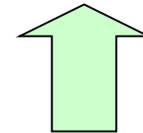

0	0	1	1
+0	+1	+0	+1
<hr/>	<hr/>	<hr/>	<hr/>
0	1	1	10

6×5:

		1	1	0		
	×	1	0	1		
		<hr/>				
		1	1	0		
		0	0	0		
+	1	1	0			
	<hr/>					
		1	1	1	1	0

Text encoding

! - 00100001
\$ - 00100100
A - 01000001
B - 01000010
Z - 01011010
a - 01100001
m - 01101110

Possibility of
operations on symbols

Computer memory

Capacitor

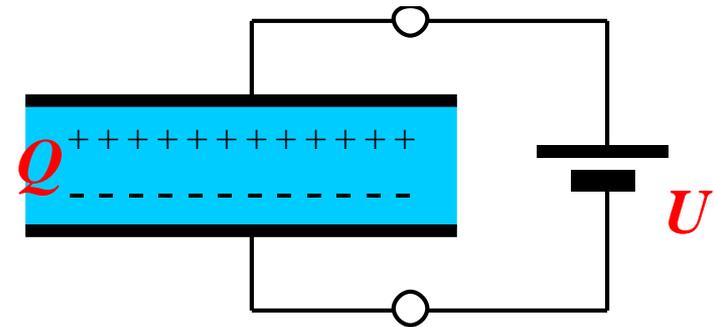

Plates

Insulator

d

$$C = \frac{\epsilon A}{d}$$

Capacity of a capacitor

$$Q = CU$$

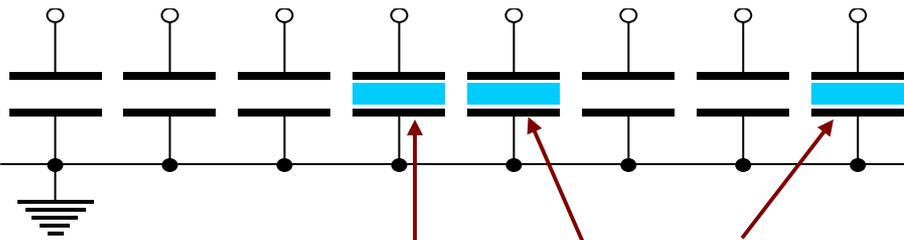

Charge

Capacity

Voltage

1 byte of memory (8 bits)

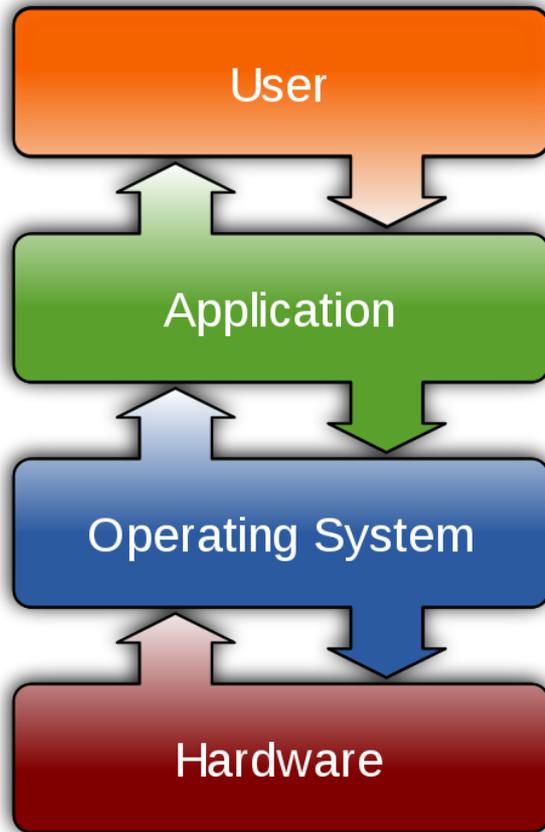

0 0 0 1 1 0 0 1

$$16 + 8 + 1 = 25$$

Operating system (OS)

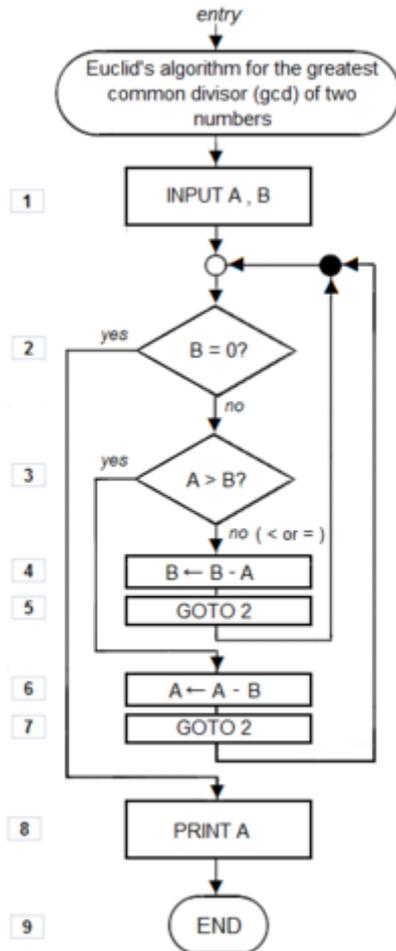

A collection of software to manage the hardware and to provide services to application programs.

OS examples: Microsoft Windows, Apple Mac OSX, Android.

Algorithm

Step-by-step procedure for calculation

Muḥammad ibn Mūsā al-Khwārizmī (Persian)

Programming languages

Generations

1. Machine code (100011 00011 01000...)

2. Assembly code →

3. Closer to human languages, compiled or assembled prior to execution (e.g. Java, C, Python, Pascal)

4. Domain-specific languages (e.g. COBOL)

5. Problem solving by using program constraints, instead of algorithms written by programmer (artificial intelligence, learning from examples).

<u>Address</u>	<u>Instruction mnemonic</u>	<u>Arguments</u>
00000000	push	ebp
00000001	mov	ebp, esp
00000003	movzx	ecx, [ebp+arg_0]
00000007	pop	ebp
00000008	movzx	dx, cl
0000000C	lea	eax, [edx+edx]
0000000F	add	eax, edx
00000011	shl	eax, 2
00000014	add	eax, edx
00000016	shr	eax, 8
00000019	sub	cl, al
0000001B	shr	cl, 1
0000001D	add	al, cl
0000001F	shr	al, 5
00000022	movzx	eax, al
00000025	ret	

Python versus assembler example

Program for printing a „Hello World” message

X86 assembly language – x86-64 Linux, AT&T syntax

```
.section          .rodata
string:
    .ascii "Hello, World!\n\0"

length:
    .quad . -string          #Dot = 'here'

.section          .text
.globl _start          #Make entry point visible to linker
_start:
    movq $4, %rax          #4=write
    movq $1, %rbx          #1=stdout
    movq $string, %rcx
    movq length, %rdx
    int $0x80              #Call Operating System
    movq %rax, %rbx        #Make program return syscall exit status
    movq $1, %rax          #1=exit
    int $0x80              #Call System Again
```

Python versus assembler example

Program for printing a „Hello World” message

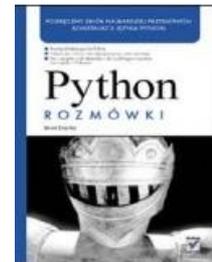

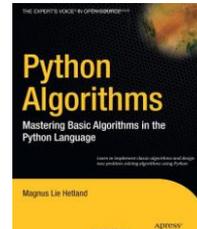

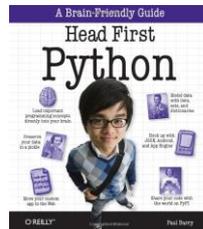

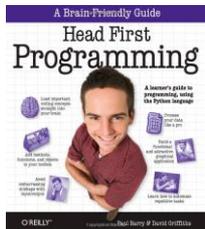

Python language

```
print "Hello World"
```

Literature

- **Head First Programming: A Learner's Guide to Programming Using the Python Language** by David Griffiths

- **Programowanie z Pythonem** podręcznik stworzony dla studentów I roku neuroinformatyki I fizyki medycznej na Wydziale Fizyki Uniwersytetu Warszawskiego (http://brain.fuw.edu.pl/edu/TI:Programowanie_z_Pythonem/Wersja_do_druku)
- Many many more books and tutorials available on the Internet

Final mark

- 5 computer tests during the semester (75 %)
- Activity during classes (attendance, presentations, programming project) (25 %)

General Advice

- Slides shown during lectures do not cover all knowledge needed for passing the exam.
- Knowledge is acquired through studying and exercise.
- It is wise to take notes.
- It is worth browsing tutorials of Python modules used during classes.

Download and Installation of EPD

The screenshot shows the Enthought website with several red circles highlighting key elements:

- The browser address bar showing `www.enthought.com`.
- The navigation menu at the top right, with `www.scipy.org`, `downloads`, and `blog` highlighted.
- The main content area featuring a large banner for "Enthought Python Distribution 7.3" with a "SUBSCRIBE" button.
- A sidebar on the left with sections for "Enthought Python Distribution 7.3", "EPDFree 7.3", "EuroSciPy 2012", "Software Developer", and "UPCOMING LIVE TRAINING".
- A "PRODUCTS" section describing the EPD as a cross-platform environment for scientific computing.
- A "CONSULTING" section describing services for software development and data manipulation.

Download and Installation of EPD

The screenshot shows the Enthought website's EPD subscription page. The page title is "Buy a Subscription to EPD". Below the title, there are three buttons: "SUBSCRIBE", "ACADEMIC", and "EPD FREE". The "ACADEMIC" button is circled in red. The page lists four subscription levels: BASIC, SILVER, GOLD, and PLATINUM. The "ACADEMIC" button is circled in red.

	BASIC	SILVER	GOLD	PLATINUM
Price	\$199	\$180 per user	\$990 per user	Specialized pricing
License	individual license	10 license minimum	10 license minimum	structure based on enterprise budget & needs
Platforms & Architectures	All platforms & architectures	Add users in increments of 10	Add users in increments of 3	
Installation	Email installation	Phone & email	Phone & email	Custom phone/email
